PROFESSIONAL DENTAL SUITES

An innovative private provider of specialised
and specialist patient care

Faculty of Health Sciences
School of Dentistry

State of the art infection control facilities

SERVICES AVAILABLE

We offer general and specialist dental care in the following areas:

- General dentistry
- Implants
- Restorative dentistry
- Endodontics
- Periodontics
- Prosthodontics
- Digital radiology

OUR STAFF

While dental care at the CACDRC is carried out by our dentists, the quality of our care is very reliant on the expert assistance of our office staff and dental assistants.

Our senior staff, Jane Burns and Julie Rossi have extensive experience in dental assisting and will be very pleased to provide you with any additional information or assistance you may need.

Our dentists are all registered dental practitioners with the South Australian Dental Board and many of them are also registered specialists with the Dental Board.

Some of our dentists hold academic positions within the University, ranging from Professor, Associate Professor and Senior Lecturer. Others are part time tutors for the University who also maintain busy full time private practices elsewhere, as well as here at the CACDRC Professional Dental Suites.

PRODUCT RANGE

Because of our close association with Colgate Oral Care, we are able to offer our patients a full range of Oral Care products. These are on display in our waiting room and each of the six operatories. This range is continually being upgraded and replaced as new products become available. If you need any assistance with regards to our product range, please feel free to talk with your dentist or one of our helpful assistants.

GOALS

The Centre aims to be an innovative provider of specialised and specialist patient care. We aim also to service the needs of the profession, for authoritative leadership in patient care, and the needs of the industry, for demonstration and showcasing of their products.

The Colgate Australian Clinical Dental Research Centre (CACDRC) Professional Dental Suites are a unique entity in Australian Dentistry.

Our clinics are associated with a Research Facility of undoubted world class. As a result, each of the six operatories are equipped with the most modern state-of-the-art clinical facilities currently available. These facilities are supported by advanced infection control procedures, fully computerised patient records and sophisticated digital radiology. While the Centre receives significant support from its corporate sponsor, Colgate Oral Care, our private practice is a major part of our daily activities.

Our professionally designed facilities are purpose built to make our patients feel relaxed, comfortable and confident in the knowledge that they have access to some of Adelaide's leading general and specialist practitioners using some of the most advanced and current equipment and materials available.

The CACDRC Professional Dental Suites provide
