Notes:

* denotes author from another University department

** denotes author was external to the University

departmental authors bolded

there are several records above where a Public Health author is marked external because no by-line was available – these have been included to show departmental affiliation

leading 10 digit number is the ResearchMaster reference to this publication – this should be removed for web publishing purposes.

You will find publications on this list not necessarily submitted by Public Health. The departmental affiliation is obtained by the author, so that if another department submits a publication containing Public Health authors, these records will automatically appear in your list. This is one of the features of the new ResearchMaster collection process.
