

DO YOU HAVE PERIOD PAIN? JOIN OUR CLINICAL TRIAL.

Alyra Biotech has developed a new intrauterine device (Alyra Device) to help people with difficult to manage period and pelvic pain, including the pain associated with endometriosis. Professor Louise Hull and the great team of doctors and nurses at PARC Research Centre located within the Royal Adelaide Hospital invite you to be part of this important trial. They will care for you throughout the study period, and you can withdraw from the trial at any time if the device doesn't suit you. The first 12 participants are required to have at least one child to assist with insertion of the device. After this, the trial will be available to a wider group of people.

Alyra Biotech is an Adelaide-based company, and this is proudly a South Australian initiative.

Trial benefits for you:

- Being part of a trial especially designed to help people with difficult to manage pain
- \$2000 payment for time spent at the clinic
- Pelvic ultrasound
- A consultation and pain management plan for your future pain needs

The trial involves:

- One overnight stay and additional visits to PARC
- Insertion of an intrauterine device
- Recording your experience on a phone APP each day

To find out more, please scan the QR code or click the link below.

This will take you to a short questionnaire to see which Alyra trial you are eligible for.
