

BASED TRAINING

BACHELOR OF PHYSIOTHERAPY (HONOURS)

Help people overcome injury and disability, preserve physical condition, and improve athletic performance

ua.edu.au/allied-health

TRANSFORM LIVES THROUGH FREEDOM OF MOVEMENT

Physiotherapists help people recover, maintain and enhance their ability to move freely and without pain. With 24% industry growth predicted by 2024*, skilled physiotherapists are in high demand.

What will you do?

Our Bachelor of Physiotherapy (Honours) equips you to diagnose, treat and prevent the full range of human movement problems.

With courses taught by registered practising physiotherapists, the degree places an emphasis on real-world experience. In over 900 hours of work-based training, you'll work with children and adults of all ages in multiple settings; public and private health organisations, schools, rehabilitation centres, sporting organisations, aged care and more.

Gain high-level knowledge and skills in:

- human anatomy, biomechanics, and physiology
- clinical assessment and management of patients with cardiothoracic, musculoskeletal and neurological dysfunction, and developmental disorders
- safe patient handling practices and patient education
- · broad public health issues
- evidence-based, client-centred care.

Unrivalled study experience

You'll regularly access our purpose-built training facilities and state-of-the-art simulation suites—among Australasia's most advanced. And you'll benefit from collaborative interprofessional learning with key complementary disciplines, speech pathology and occupational therapy.

You'll learn from lecturers and academics with many years of clinical experience and research expertise and gain advantage from strong professional links to the health care industry.

From late third year, you'll choose one of two streams—research* or industry—and undertake a major project. Research will hone your skills in developing new knowledge; industry focuses on integrating research into practice.

*Entry into the research stream will be based on academic merit.

Where could it take you?

You'll graduate eligible to pursue a wide range of career opportunities. You could help a range of people better manage a variety of health conditions. You might help a child take their first steps, or you could help someone get back to work, sport or other activities. Those in the research stream may change the way we assess and manage a range of conditions, leading to better health outcomes for the population.

Discover rewarding roles in:

- sports
- rehabilitation
- aged care
- education
- research
- public or private hospitals
- · private practice.

Good to know

SATAC Code	354251
Duration	4 years full-time
Location	North Terrace campus
